

REDOWAN DELOWAR

Storage & Distributed Systems

Berlin, Germany | github.com/rednafi | linkedin.com/in/rednafi | redowan.nafi@gmail.com | +49 157 54763903

Backend engineer with 8+ years of experience, focused on storage, resilience, and observability. Operates multi-region, active-active databases at petabyte scale. Writes about Go, databases, and distributed systems at rednafi.com (20k+ monthly readers).

WORK EXPERIENCE

WOLT (DOORDASH)

Senior Software Engineer | Berlin, Germany | Oct 2023 - Present

- Own the multi-tenant control plane that provisions, scales, and repairs 100+ multi-region, active-active Cassandra clusters (2,000+ nodes) for Wolt and DoorDash.
- Build and operate the Go data plane that fronts the Cassandra clusters, centralizing authorization, query observability, and traffic control.
- Set the structured logging standard and drove its adoption across Wolt's 400+ backend services.
- Built the high-performance log ingestion and query platform that streams 30+ TB of logs a day from every backend service through Vector and Kafka into ClickHouse and serves queries through Grafana.
- Diagnosed head-of-line blocking in the shared job queue and split latency-sensitive work onto a dedicated Go worker tier, cutting p99 job-start delay from minutes to seconds.
- Plan capacity for the storage fleet, review data-layer designs for teams across Wolt, and carry on-call for the platform.
- Mentor engineers and serve as bar raiser in Wolt's interview loops for Go, backend, and distributed-systems roles.

DENDI

Software Engineer | Remote (US) | Sep 2020 - Jul 2023

- Designed a Kafka-backed orchestrator (FastAPI) that decoupled job execution from the Django monolith, unblocking independent deploys.
- Shipped webhook delivery on a stateless Go service with retry and dead-letter handling (SQS, Cassandra, Lambda).
- Built Go edge agents that stream lab-instrument readings from device fleets into Postgres for post-processing.

SHOPUP

Data Scientist | Dhaka, Bangladesh | Sep 2018 - Aug 2020

- Engineered a CDC pipeline (Postgres to Kafka to Snowflake) that enabled near-real-time lending analytics.
- Owned the credit-eligibility inference backend that automated creditworthiness checks for microloans (Flask).

SKILLS

Languages

Go Rust Python TypeScript SQL

Databases

PostgreSQL Cassandra DynamoDB MongoDB ClickHouse Snowflake Elasticsearch

Infrastructure

Kafka Vector Spark AWS Kubernetes Terraform Grafana OpenTelemetry Datadog

OPEN SOURCE & COMMUNITY

- Open-source contributor since 2017, with [projects](#) used by thousands of developers.
- Participant in Go proposal discussions on the [golang/go](#) issue tracker and in [r/golang](#) (as u/sigmaio).
- Author of rednafi.com: 230+ posts since 2020 on databases, Go concurrency, and distributed systems.
- Speaker at GDG Berlin and guest on the Cup o' Go podcast.

EDUCATION

AHSANULLAH UNIVERSITY OF SCIENCE & TECHNOLOGY

BSc, Electrical & Electronic Engineering | Dhaka, Bangladesh | 2014 - 2018
