

REDOWAN DELOWAR

Senior Software Engineer: Backend & Distributed Data Systems

Berlin, Germany | github.com/rednafi | linkedin.com/in/rednafi | redowan.nafi@gmail.com | +49 157 54763903

Senior Software Engineer with 8+ years of experience delivering backend systems and data infrastructure at startups and large technology companies. Specializes in distributed systems, databases, streaming, and observability, with a track record in system architecture, reliability, performance, and production operations. Writes about databases and distributed systems at rednafi.com, reaching 20k+ monthly readers.

PROFESSIONAL EXPERIENCE

WOLT, A DOORDASH COMPANY

Senior Software Engineer | Berlin, Germany | Oct 2023 - Present

- Own and operate the multi-tenant control plane for Wolt and DoorDash's petabyte-scale, multi-region Cassandra fleet, automating cluster provisioning, scaling, and repair.
- Design and operate the Go data plane in front of the Cassandra fleet, centralizing authorization, query observability, and traffic control.
- Built Wolt's centralized log ingestion and query platform, streaming backend logs through Vector and Kafka into ClickHouse for exploration in Grafana.
- Defined Wolt's structured logging standard and led its adoption across the backend service fleet.
- Diagnosed head-of-line blocking in the shared job queue and split latency-sensitive work onto a dedicated Go worker tier, substantially reducing p99 job-start latency.
- Lead storage capacity planning and conduct data-layer design reviews for teams across Wolt, advising on scalability and operational tradeoffs.
- Mentor engineers and conduct technical interviews for Go, backend, and distributed-systems roles.

DENDI

Software Engineer | Remote (US) | Sep 2020 - Jul 2023

- Designed and delivered a Kafka-backed orchestration service that separated job execution from the Django monolith, enabling independent deployments (Python, FastAPI, Kafka).
- Built a stateful webhook delivery service with retry and dead-letter handling (Go, SQS, PostgreSQL, AWS Lambda).
- Built Go edge agents that streamed lab-instrument readings from device fleets into PostgreSQL for post-processing.
- Owned and operated the Django/PostgreSQL backend powering Dendi's laboratory management system for 50+ customers, processing an average of 100k+ orders per day (Python, Django, PostgreSQL).

SHOPUP

Data Scientist | Dhaka, Bangladesh | Sep 2018 - Aug 2020

- Built a CDC pipeline (PostgreSQL, Kafka, Snowflake) for near-real-time lending analytics.
- Built and operated the Flask inference service that automated credit-eligibility decisions for microloans (Python, Flask).

TECHNICAL SKILLS

Languages

Go Python SQL Kotlin TypeScript

Storage

Cassandra PostgreSQL ClickHouse DynamoDB MongoDB Elasticsearch Snowflake

Infrastructure

Kafka Vector Spark AWS Kubernetes Terraform Grafana OpenTelemetry Datadog

OPEN SOURCE & COMMUNITY

- Creator and maintainer of [fastapi-nano](https://github.com/rednafi/fastapi-nano) (1k+ GitHub stars, 100+ forks) and several Go and Python developer tools.
- [Speaker at GDG Berlin](#) ("Go Interface Segregation Redux"); guest on the [Cup o' Go podcast](#) to discuss Go design and dependency injection.

EDUCATION

AHSANULLAH UNIVERSITY OF SCIENCE & TECHNOLOGY

BSc, Electrical & Electronic Engineering | Dhaka, Bangladesh | 2014 - 2018
